Need Training in Tower Rescue?

This practical training course is specifically designed for personnel required to work aloft on structures such as communication and transmission towers, pylon and masts.

The course, consisting of 3 days, also incorporates the 1 day Nationally Recognised Work Safely at Heights course and provides participants with the essential skills and knowledge required to perform vertical rescue operations from industrial structures.

Topics Covered

Controlling of risks associated with rope rescue, Inspection and maintenance of rope rescue equipment, Selection and rigging of anchors, Tying of knots, Tower climbing, Self rescue, Rescue of a suspended casualty and Casualty management and stabilisation.

Course Logistics

Number of Participants: Minimum 4 - Maximum 6

Where: Australia Wide

Duration: 3 Day's – Day 1 of the course is the Nationally Recognised Work safely at heights course.

Equipment: Can be supplied by Access Unlimited

Meals: Lunch provided (only on our premises)

Note: This course is physically demanding and participants must be capable of climbing towers/masts and to perform work at heights.

On successful completion of the course a Statement of Attainment will be issued for the nationally recognised Work safely at heights course, and for the Tower Rescue component a 'Certificate of Attendance' will be issued.

To make a booking please contact our Training Manager on **1800 607 558** or email: contact@accessunlimitedtraining.com.au
